PERSONAL PROJECTS

Telephone Directory - C++
- Project refers to the phonebook directory same as in a phone. You can manage your own directory by adding name, number, email, date of birth, and many more details and search any name with any of the given inputs.

Tourism Tour and Travel Agency Website
- It was made by using HTML CSS, JavaScript. The project was developed to book packages, search specific package on given input location, which also includes many web pages like contact-us, home page, package page, about-us, payment page. But all the web pages were static.

Reconnaissance and Scanning
- In Ethical hacking training ,we were given a task to find all the servers and their location as well as scanning the websites for any vulnerabilities.

Analysis Using Tableau: Data Science
- Finance data taken from public tableau website and developed a dashboard with various KPI's (Key Performance Index) and analysed the data.
